

empowHer's opening 10/31/23! *what you need to know!*

Our Mission

To empower women in all stages of life through quality and compassionate healthcare - one person, one visit, one treatment at a time.

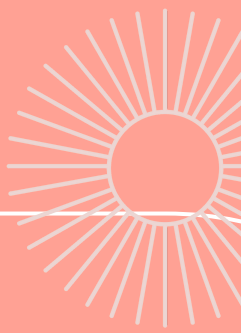

Our Core Values

- Exemplify the character of Jesus using empathy, compassion and respect
- Provide excellent care to our patients and serve by putting their needs above our own
- Work as an accountable, honest and friendly team

Our goals

To provide excellent care utilizing not only office based conventional medical care but also supplementary services and non-biased education to treat all aspects of women's health such as menopause, pelvic pain, hormone imbalance, and obesity. We will hit the ground running to be a center of excellence on women's health.

Pregnancy

We want to provide education and community during this time unique to any other practice in the Big Country. We believe there is power in knowledge. We have great things in the works for pregnant women!

We know - you know

We know it's easy to find a massive amount of information on the internet - but we also know it's nearly impossible to know if it's biased! Therefore, we are committed to providing sound, unbiased medical advice using conventional, holistic and preventative medicine (as well as experience in taking care of women for their lifetime and just being a woman!) - to help you right where you are in life.
